- Filter crude oil data to see which days had a closing price above $70.

```
select close_value as closing_price from crude_oil where close_value>70;
```

- Get the highest and lowest values recorded in NASDAQ 100 daily data.

```
select MAX(high_value) ,MIN(low_value) from nasdaq_100_daily;
```

- Count how many entries exist for each company in the minute-level NASDAQ data.

```
select company_prefix as entries, count(*) from nasdaq_100_minute group by company_prefix order by company_prefix desc ;
```

- What is the company prefix with the highest trade volume in the NASDAQ 100 daily data? What date did this happen and what was the volume?

```
select date_value, volume from nasdaq_100_daily group by volume, date_value order by volume desc limit 1 ;
```

- What are the company prefix(es) with the top 10 highest trade volumes? Include dates and volumes as in the previous query.

```
select company_prefix ,date_value, volume from nasdaq_100_daily group by company_prefix ,volume, date_value order by volume desc limit 10 ;
```

```
SELECT company_prefix, date_value, volume FROM ( SELECT company_prefix, date_value, volume,
      ROW_NUMBER() OVER (PARTITION BY company_prefix ORDER BY volume DESC) AS rn
  FROM nasdaq_100_daily
) sub
WHERE rn = 1
ORDER BY volume DESC
LIMIT 10;
```

- Exclude the company prefix(es) from your previous query and find the top 10 again as before. What are the company prefix(es) now?
